

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Introduction to Occupational Safety and Health (OSH)

Session Objective:

At the end of the session, the participants will be able to **explain** the importance of OSH, national OSH data

Why the need for OSH?

**Every worker has the right to
a SAFE and HEALTHY
workplace!**

Occupational Safety & Health

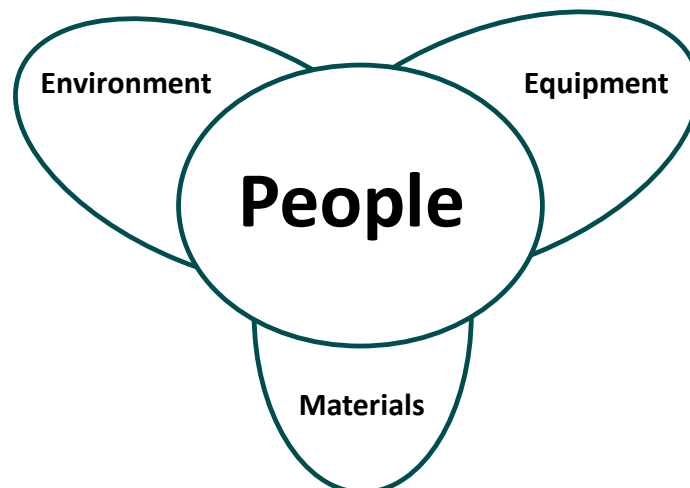

- Occupational Safety and Health is devoted to the **recognition** and **control** of factors **(hazards)** in the workplace, which may cause death, disability, injury, sickness, or great discomfort and inefficiency among the workers.

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Focus of OSH

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Did you know?

- Every **15 seconds**, a **worker dies** from a work-related accident or disease.
- Every **15 seconds**, **160 workers** have a **work-related accident**.

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Global OSH Data: ILO Report

340 million work-related accidents annually

160 million victims of work-related illnesses annually (causing more than **4 days** absence)

Source: *International Labour Organization*

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Global OSH Data: ILO Report

2.02 million people die each year from work-related diseases.

321,000 people die each year from occupational accidents.

Occupational accidents occur mostly in:

- agriculture
- mining
- construction
- commercial fishing

Source: *International Labour Organization*

Department of Labor and Employment

OCCUPATIONAL SAFETY AND HEALTH CENTER

Global OSH Data: ILO Report

4% or over 1.25 trillion USD of the world's GDP is lost due to occupational diseases and accidents

Remember

- Everyone has a right to a safe and healthy workplace.
- OSH is prevention of workplace injuries and diseases

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

General Concepts on OSH

Session Objective:

At the end of the session, the participants will be able to **define and discuss** the general concepts of OSH towards effective OSH implementation in the workplace.

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

ACCIDENT

- An occurrence or event that is unexpected/ unforeseen, unplanned and unwanted.
- Leads to:
 - loss; damage
 - injury
 - death

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Common Reasons for Accidents

Layman's version:

- 'Oras na kasi niya, hayaan na siyang mamahinga!'
- 'Ang malas naman niya!'
- 'T**** kasi niya!'
- 'Kasama sa trabaho yan!'

**These are not real causes - - -
only EXCUSES**

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Accident causation

PEOPLE

Workforce
Management of the
workforce
Policies
Behavior

MATERIALS

Used, worked or made

EQUIPMENT

Tools and Machinery

ENVIRONMENT

Physical surroundings
Natural environment
Community, social & legal influences

Accident causation refers to the factors that are the primary reasons behind an **accident**.

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

H. W. Heinrich, Domino Theory

▪ Study of Accidents

- 98% – Preventable
 - **88% - Unsafe/Unhealthy Acts**
 - **10% - Unsafe/Unhealthy Conditions**
- 2%* – Non-Preventable

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Unsafe / Unhealthy ACT

- A **human action** that **departs** from a standard or written job procedure or common practice, safety rules, regulations, or instructions.
- A **violation** of a **commonly-accepted safe procedures** and or **processes**.

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

What will you look for as safety officers?

Unsafe Acts

- **Operating** equipment without authority
- **Removing** safety devices
- **Using** Defective equipment
- **Using** improper/**Not using** of PPE
- **Horse-playing**

Unhealthy Acts

- **Smoking** cigarettes in the workplace
- **Inhaling** organic solvents
- **Drinking** alcoholic beverage during office hours
- **Taking** illegal drugs inside company premises

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Unsafe/Unhealthy Condition

- The **physical or chemical property of a material, machine or the environment** that may result in **injury to a person, damage or destruction to property and other losses**;
- could have been **guarded or prevented**.

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

What will you look for as safety officers?

Unsafe Conditions

- **Defective** tools/equipment
- **Congested/blocked** exits
- **Inadequate** warning systems
- **Slippery** floors
- **Hazardous** atmospheric condition

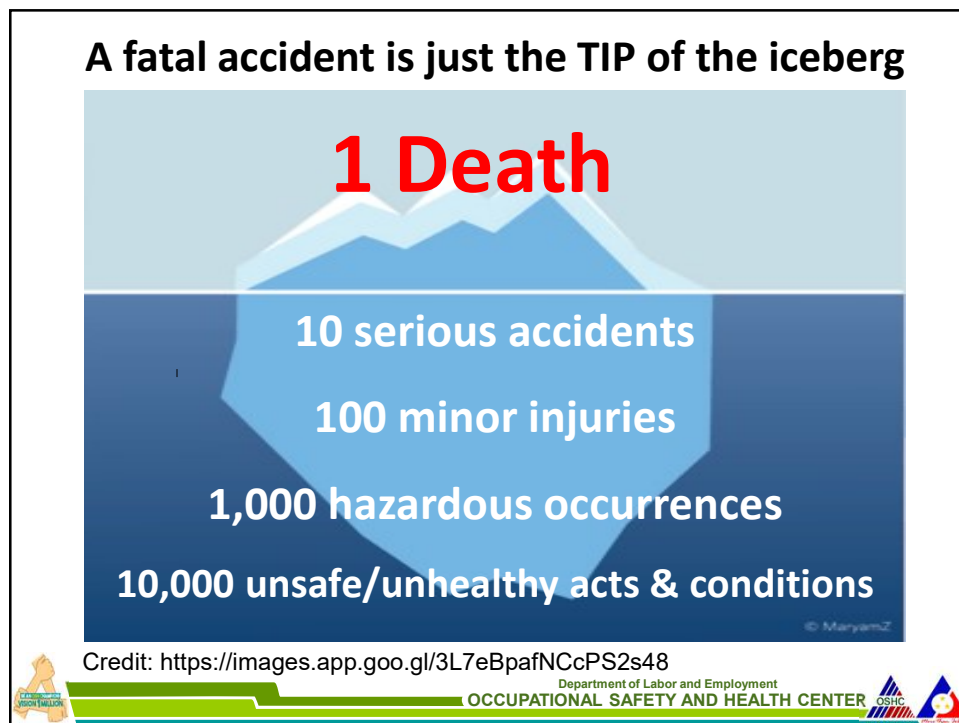

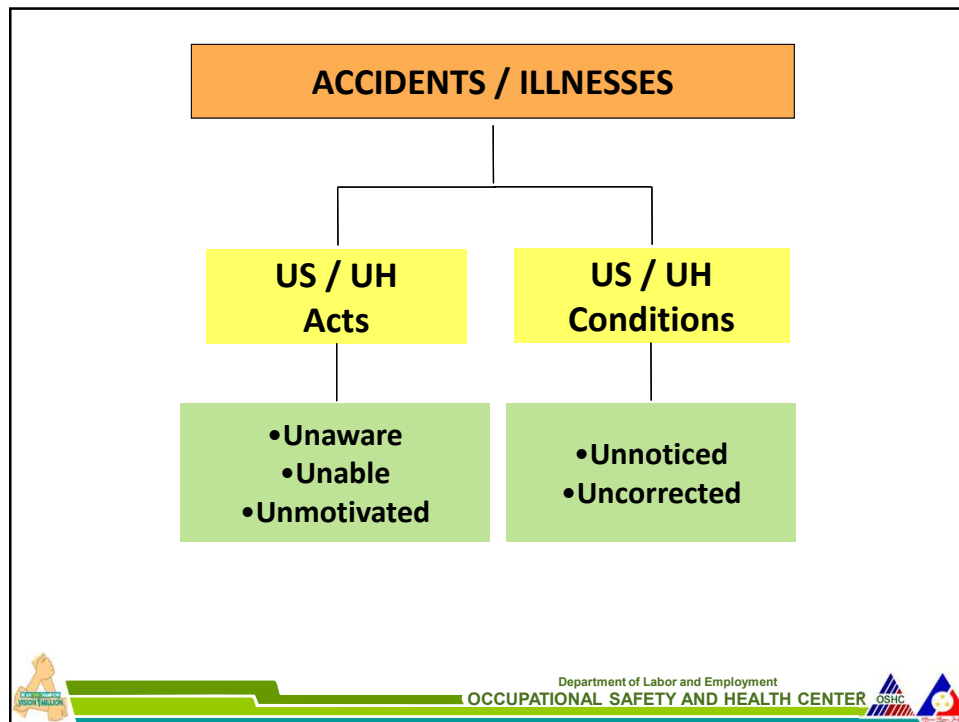

Unhealthy Conditions

- **Excessive** noise
- **Inadequate** illumination/ventilation
- **Extreme** temperature

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

As safety officers, you need to:

- identify the **unsafe/unhealthy acts and conditions** in your workplaces
- implement control measures to prevent accidents and illnesses

Department of Labor and Employment
OCCUPATIONAL SAFETY AND HEALTH CENTER

Clear Points

- Accidents and injuries result to losses of lives, limbs, time and property
- Most accidents at work could have been prevented. Unsafe and unhealthy acts and conditions in the workplace must be addressed.
- Every workplace has different hazards, risk, levels of exposure. Tailor fit your OSH response to your risk classification.
